

July 3, 2014

Dear Scott,

Here's what I show for the 1998 color breakdown:

white: 268	blue: 30
black: 1787	gold: 65
red: 649	purple: 13
silver: 262	

For tops, I show 2,714 coupes and 360 convertibles. These don't add up to 3,083 because of incomplete data records for pilot cars, etc. We didn't track transmission types in '98. For the Formula option we show 238, including pilots.

According to our records, your VIN 2G2FV22G1W2231048 is a silver 1998 Formula WS6 coupe. One of 33 made, yours was converted by us on June 30th, 1998. It was our build number 2,626, 7th from the end of 1998 WS-6 production.

The 1998 model year WS6 breakdown is:

3,083 WS6s built, 238 were Formulas.

2,723 coupes, 360 Convertibles

262 silver

With your specific combination (silver Formula coupes), we built 33. From my records I can not tell if yours is the only Silver Formula WS-6 with the 1 LE package, but it may be.

I hope this information is helpful.

All the best, sincerely,

Marcus A. Shelley
